

Rotary Ventilator

PLASTIC

This new model Rotary Ventilator is better-locking and up to 25% more efficient in removing stale air from within a vehicle.

Most significantly, however, there is now an inside adaptor-ring, allowing neat and easy installation of an inside grille, concealing all fixing screws and making the ventilator entirely suitable for mini-buses and other 'prestige' applications. Other applications include small trailers, horseboxes and delivery vehicles.

Construction prevents entry of rain, dust, and down-draughts. Air-scoop revolves on two steel bearings and will catch breeze even in stationary (exterior) locations. Quiet in operation with excellent rate of air movement.

- Moulded in ABS with two steel bearings and stainless steel centre-shift
- Four stainless screws/nuts provided & clips for inside grille*

*Grille available separately. See Part No. 22485

Part No.	A	B	C	D (Grille* outer diameter)
22484	120	140	240	160

All dimensions shown in mm unless otherwise stated. We reserve the right to alter specifications without notice.
